LinkedIn: www.linkedin.com/in/emanuel-da-silva

As a junior full stack software developer, I am passionate about using my technical skills and creative problem-solving abilities to develop innovative solutions that meet the needs of clients and users.

With experience in front-end and back-end development, I am skilled in working with a range of programming languages and frameworks and am always eager to learn new technologies. I am dedicated to delivering high-quality work on time and am committed to continuously improving my skills to stay up to date with the latest developments in the field. I am a team player with strong communication and collaboration skills and am always willing to go the extra mile to ensure project success.

- CSS3

Details:
Full CRUD Django e-commerce site allowing users to view, review, purchase and include blogs around the exciting world of dinosaurs. Branched use of git version control. Developed using agile methodologies utilising GitHub projects. Originally deployed on Heroku; migrated to Render.

HACKATHON PORTFOLIO

During various hackathons I have held the role of Scrum Master, as well as various other team positions. During hackathons I have maintained commitment to an organised team, required tasks, keeping track of deadlines, and ensuring good agile practises were followed.

Hackathons are such valuable experiences for me, allowing me to test and practise my skills as a developer. They have also given me multiple opportunities to work alongside others on the same project and have pushed me to create some fantastic projects while having fun and meeting new people at the same time.

Hackvent-calendar

Summary:
Hackathon winning project. An advent calendar style site with an interactive coding problem for each day of December utilising HTML5, CSS3, JavaScript and Bootstrap.

Icecapades

Summary:
Hackathon podium position. A retro side-scroll platformer developed using JavaScript canvas, HTML5 and CSS3.

LGBTQ+ History

Summary:
An informative website about the LGBTQ+ movement using HTML5, CSS3 and Bootstrap v5.

Holidates

Summary:
A responsive front-end site utilising HTML5, CSS3, JavaScript, Bootstrap and a rudimentary JSON-based database for easier maintenance and rapid updates.
